Credit Program Narrative

Certificate of Achievement: \_\_\_\_\_Software Development in C++\_\_\_\_\_

**Item 1. Program Goals and Objectives**

Students learn software development techniques and methods for creating applications in C++. Students also apply these skills in practical projects relevant to the software industry. The successful student will be able to use much of the coursework toward a BS in computer science.

Program Learning Outcomes:

- Students are able to design, document, test and debug programs using C++
- Students use design patterns in application programs
- Students demonstrate techniques for creating modular reusable code

**Item 2. Catalog Description**

C++ is a high-level programming language that lets you work quickly and integrate systems more effectively. C++ programmers are employed in research, data science, machine learning, artificial intelligence, quality assurance, web back-end, and other careers throughout the software industry.

**Item 4. Master Planning**

Most of the prospective students of this Certificate of Achievement are from the San Francisco Bay Area, which is a hub of technological innovation in the world. However, the certificate is relevant and useful to any student who wishes to contribute to the area and potentially seek employment with one of the major multinational technology companies. There is a great need within the software industry for more trained graduates of diverse backgrounds, which is a need this certificate seeks to meet.

**Item 6. Place of Program in Curriculum/Similar Programs**

None.

**Item 7. Similar Programs at Other Colleges in Service Area**

This program is like the De Anza College Certificate of Achievement for Programming in C++. Data shows that there is currently yet unmet demand for graduates in this area.

Several students at Foothill college come here from north of Foothill and will be better served by an offering of this program at our campus. Furthermore, the focus of our program is different from the De Anza offering due to our emphasis on software engineering patterns and principles.

None of the community colleges in the San Mateo Community College district (north of Foothill) offer this program currently.

**Additional Information Required for State Submission:**
